Other time deposits	176,133.33
Total of time deposits subject to reserve, two preceding items	235,262.65
Total	\$613,840.13

State of Ohio, County of Mahoning, ss:

I, Mark H. Liddle, Cashier of the above-named bank, do solemnly swear that the above statement is true to the best of my knowledge and belief.

Subscribed and sworn to before me this 10th day of January, 1920.

C. C. FOWLER, Notary Public.

Correct—Attest:

G. N. DOUGHTON,
D. CAMPBELL,
J. S. HARDING,
Directors.

WHY Is a Black Sheep?—And Some Other Whys

Why is there a black sheep in every flock?

Because sheep, in their early domesticated conditions, were brown or dirty black, and because nature occasionally "harks back" or reverts to early type in nearly all species.

Why does a red flag infuriate a bull? Because, according to one theory, the animal "sees red." The condition which occurs naturally, in certain circumstances (as on the battlefield), in man, rendering him indifferent to danger, is produced artificially in the bull, with like results.

Why does a dog turn round and round before lying down? Because the animal's ancestor, the wild dog, made its bed thus by forming a hollow in the leaves and branches.

Why has the camel got a hump? Because in its natural state it needs an "emergency ration." If deprived of food for several days, it falls back on the fat of its own hump, which then gradually disappears before the limbs are perceptibly reduced. That it carries a reserve of water in its stomach is well known.

Why is the underpart of a rabbit's tail white? Because the appendage has on occasion to serve as a danger signal. Violently agitated as it is on the approach of danger, it can be seen by other rabbits even at dusk, whereas it might be wholly invisible if the color of the tail was uniform with that of the body.

Why has a cat got whiskers? Because otherwise—and this applies to the whole of the feline family, including lions and tigers—its eyes would lose sight of prey, such as birds or mice, through fatigue arising from concentration. Experiments prove that cats deprived of their whiskers catch few mice, or none at all.

MAKES WOOD MORE DURABLE

How New Process Works Is Explained by Consular Official in Copenhagen, Denmark.

To prepare the cheaper kinds of woods by a patented method that makes them more durable is the purpose of a concern just organized in Koge, Denmark, according to the commercial attaché in Copenhagen.

The woods especially to be prepared are birch, ash and elm, all wood treated by this process being called teakin wood.

Certain changes in the character of the wood that normally take place only after many years of drying are by this chemical process produced within 24 hours. Thereafter, when the moisture that may still be left has evaporated, the wood becomes harder and more durable than by the aging process.

Teakin birch is of a beautiful golden brown color and when polished with polish it takes on a mahogany red hue. Teakin ash is a substitute for oak. Teakin elm has none of the disadvantages of natural elm. Teakin fir is of a uniform color all through and is used for office fitting and furniture and for veneering.

How to Exterminate Pests.

Rats in the United States cause an annual loss amounting to millions of dollars. Among food products that suffer, grain in storage is perhaps the most important. Buildings under process of construction and intended to hold grain should be made rat and mouse proof; and elevators and other structures already built, should be reinforced against the pests, says F. L. Washburn, economic zoologist at Wisconsin University farm.

A bulletin on the extermination of rats and mice, written by Mr. Washburn, may be had without charge on application to the office of publications, University Farm, "Uses of Concrete on the Farm," bulletin 401, issued by the United States department of agriculture, gives details for the use of concrete in preventing losses by rats and mice. This bulletin is also for free distribution. Application for it should be made to the division of publications, United States department of agriculture, Washington.

How Russia Is Suffering.

If the people who stand in queues for one single day in Russia were queued in one queue, they'd go seven times around the world and get as far as Peoria on the eighth lap. I suppose my most vivid impression of revolutionary Russia is that of an endless line of tired, hungry, disheartened people. In America a queue means something that Chinamen used to wear before Japan became imperialistic. In Russia a queue means the only road that leads anywhere and to anything. People stand in line for hours on end to draw their pitiful rations of a quarter or a half-pound of sour black bread; they stand on one foot and then on the other, and then move up a foot in order to buy a pair of shoe strings. And if they want to start on a railroad journey on, let us say, Friday, they begin queuing along some time around Monday.—Exchange.

How Nervous Sensation Is Caused.

Experiments with a supposed radiation of effluence from the human body have been conducted by a Swedish psychologist with graphic results, announces Popular Mechanics magazine. The effluence, flowing most readily from the finger tips, is said to cause actual nervous sensation and even muscular contraction on the body areas experimented with. The scientist has gone farther, too, by handling the body emanations almost like an electric current.

For a Persistent Cough.

Some years ago H. P. Buntage, a student at law in Greenville, S. C. had been troubled for a long while with a persistent cough which he says, "greatly alarmed me, causing me to fear that I was in the first stage of consumption." Having seen Chamberlain's Cough Remedy advertised he concluded to try it. "I soon felt a remarkable change and after using two bottles of the small size was permanently cured."—Adv.

GOOD PROFIT IS FOUND IN KELP

Besides the Commercial Potash Many Valuable By-Products Are Turned Out.

EXPERIMENTS ARE SUCCESS

Plant Established by Government in California Demonstrates Profit Can Be Made With Production on Commercial Basis.

Washington.—Kelp, apparently, is going to be a profitable source of potash, an important fertilizer ingredient that the United States formerly obtained almost wholly from Germany. During the war an experimental kelp-potash plant was established by the United States department of agriculture at Summerland, Cal. Before the second year of operation was completed it had been determined not only that the plant could be made self-sustaining on the basis of potash alone, at \$2.50 a unit, but that a number of valuable by-products could be profitably obtained. The chief of the bureau of soils, which bureau operates the enterprise, estimates that if the plant turns out \$300 worth of potassium chloride a day, it may at the same time turn out \$200 worth a day of the four principal by-products.

Many By-Products.

Among the by-products whose commercial obtainability has been established are iodine, common salt, ammonia, and bleaching carbon. This bleaching carbon, formerly imported from Europe and sold for 20 cents a pound, has been prepared and sold from the Summerland plant at 15 cents a pound and appears at present about able to pay the production cost of itself and the potash, with good reason to believe that it may ultimately be made to pay the operating cost of the entire enterprise. It has been definitely established by large-scale operations that very little of the nitrogen of kelp is lost in the various processes and that it can be commercially recovered as ammonia, thus yielding another important fertilizer element. In this process enough combustible gas is released greatly to reduce if not to eliminate fuel consumption in the plant. A tar is likewise recovered, and its subproducts, kelp oils and creosote, have been shown to be of value, respectively, as flotation agents and disinfectants. Still other valuable by-products are likely to be recovered. "The field broadens tremendously as progress is made," reports the chief of the bureau of soils.

JOBLESS DRAIN GERMANY

Vast Sum of Money Already Paid Out to Unemployed—More Asked.

Berlin.—The German government at the end of December had spent in 1919 1,000,000,000 marks for support of the unemployed, according to the figures of the labor ministry. (The mark is worth 2.11 cents at present exchange rates.)

Another 1,000,000,000 marks will have been paid out before the arrival of the time specified for this support to cease. It is estimated.

It is planned, because of the huge amount expended in this way, to try to induce the unemployed to work on emergency labor. Undersecretary of State Moellendorf has demanded a fund of 5,000,000,000 marks to tackle the unemployment question.

The representative from Baden has announced that idle textile workers there are leaving for the Ruhr district to become coal miners.

Rajah—27c per gallon—A genuine high-test gasoline at the lower grade price. R. D. Fowler, Ford Sales & Service, Canfield.

HERE'S PERFECT WOMAN

Venus has been reincarnated in the form of Miss Rosalind E. Smith of Los Angeles, Cal., according to Robert H. Manzeck, head of a physical training school, who has made a profound study of the feminine physique.

Miss Smith attributes her perfect health and figure to nine hours' sleep, deep breathing, sleeping in the open air, light exercising and the foregoing of candy, cake and pastry.

Pfister's anthropometric chart shows Miss Smith to be ideally proportioned, with the following measurements:

Weight, 121 pounds; height standing, 63.5 inches; height sitting, 34 inches; arm reach, 64.6 inches; breadth of shoulders, 14.7 inches; breadth of hips, 13.7 inches; depth of chest, 7.5 inches; girth of neck, 12.3 inches; girth of chest, repose, 30 inches; girth of chest, expanded, 32.7 inches; girth of waist, 25 inches; girth of thigh, 21.7 inches; girth of right calf, 13.1 inches.

Frozen Rats Found in Government Supplies

London.—Frozen rats have been found in carcasses of mutton supplied by the ministry of food. This was the startling announcement made on behalf of Arthur Horsant, butcher, summoned for slaughtering 40 sheep without a permit. Solicitor Pieron for the defense said his client was supplied with Manchurian beef, which was "most awful stuff." He produced a certificate showing that mutton supplied his client by the controller was unfit for food, was rotten, and frozen rats were found in carcasses of mutton. The magistrate said he believed defendant had acted solely to provide his 8,000 registered customers with good meat, but had made a mistake and must pay a fine of \$75 with \$25 costs.

Routine Service

Collection of checks is one of the more important of the routine functions of a financial institution.

This bank, as a member of the FEDERAL RESERVE SYSTEM enjoys the use of the complete collection facilities of that great organization. Moreover, because of this connection, checks drawn upon it are free from exchange charges.

These advantages make a banking relationship with this strong institution of exceptional value.

We Want to Help You Fatten Your Hogs For Sixty Days

And if this fattening, conditioning and worm removing treatment that we furnish you for all your hogs does not produce more pounds of pork from the same amount of feed—we don't want your money for the treatment.

We know that we are safe in making this guarantee. We are backed by the makers of this treatment—AVALON FARMS HOG TONE—THE AVALON FARMS COMPANY. They absolutely authorize us to guarantee it to the limit.

We want you to try Avalon Farms Hog Tone on your herd this year. We know that you will be pleased with the results. So come into the store the next time you are in town and get a 60 days supply for every one of your hogs.

It is a safe preparation. We have investigated it and know that you'll find it easy to treat your hogs with it—for it's a highly concentrated liquid medicine for hogs only. Just mix it with any kind of slops, drinking water or dampened feed. Give it to the hogs every third day for the first six weeks and then only once a week. It is very economical as well as efficient.

Why Is A Headache?

Various Causes for this Common Affliction

Anemia or Bloodlessness a Very Common Cause

Pepto-Mangan Overcomes Anemia

and Tends to Prevent Headaches

When one has an occasional headache it is usually due to some transient or passing cause, such as indigestion, eyestrain, over-tiredness, etc. When, however, one suffers from frequent periodic headaches there is always some special reason for it. Among the most common of such reasons is Anemia or Bloodlessness. This condition is especially frequent among girls and young women and those whose occupations or habits of life keep them too much indoors. The one important necessity in such cases is to build up the quantity and quality of the weak and watery blood. Gude's Pepto-Mangan is exceptionally valuable for this purpose. It increases the number and improves the quality of the red blood cells, those vital little bodies which carry nutrition to all parts of the body. It improves the appetite, imparts color to the face, and restores health and strength to the body generally. After a short course of Pepto-Mangan the headaches decrease in frequency and severity, and finally disappear, if they are due to Anemia. Pepto-Mangan may be had either in liquid or tablet form, as preferred. When buying Pepto-Mangan be sure the name "Gude's" is on the package. Without "Gude's" it is not Pepto-Mangan.

ADMINISTRATOR'S NOTICE

Docket 25. Page 29.
Notice is hereby given that George J. Raub, New Middletown, O., has been appointed and qualified administrator of the estate of Lydia M. Raub, late of Springfield township, Mahoning county, Ohio, deceased, by the Probate Court of said county.

All persons interested will govern themselves accordingly.

JOHN W. DAVIS,
Probate Judge of Mahoning County, Ohio,
January 8, 1920.

ADMINISTRATOR'S NOTICE

Docket 25. Page 20.
Notice is hereby given that Frank C. Ewing, R. D. 4, Youngstown, O., has been appointed and qualified administrator of the estate of Samuel O. Ewing, late of Boardman township, Mahoning county, Ohio, deceased, by the Probate Court of said county.

All persons interested will govern themselves accordingly.
JOHN W. DAVIS,
Probate Judge of Mahoning County, Ohio,
December 29, 1919.
